

REMARKS

Reconsideration and further examination of this application is hereby requested. Claims 1-88 are currently pending in the application.

Attached hereto is a marked-up version of the changes made to the specification by the current amendment. The attached pages are captioned "VERSION WITH MARKINGS TO SHOW CHANGES MADE".

**A. Drawings**

Applicant appreciates the Examiner's indication of approval of the drawings.

**B. Information Disclosure Statement**

The Examiner indicates that Information Disclosure Statement (IDS) information is missing and requests that a copy be filed. However, there is no specific indication of which IDS information is missing. There have been two IDS's filed in this application citing numerous documents. Applicant desires to provide the Examiner with any information that may be missing, and awaits the Examiner's specific instructions as to what material is missing.

For the Examiner's ease of reference, enclosed herewith is a copy of the six sheets of Forms PTO-1449 that have been filed by Applicant in the two IDS's.

**C. The Double Patenting Rejections**

Claims 1-88 have been rejected under a non-statutory double

patenting doctrine, based on prior patent nos. 6,064,756 and 6,064,757. The Examiner indicates that the double patenting rejection may be overcome by submitting a Terminal Disclaimer.

Submitted herewith is a Terminal Disclaimer. Accordingly, Applicant respectfully submits that the double patenting rejection has been overcome by amendment.

**D. Amendment to the Specification**

The first paragraph of the specification, citing to related applications, has been amended to more clearly cite the related applications. No new matter has been entered.

**E. Closing**

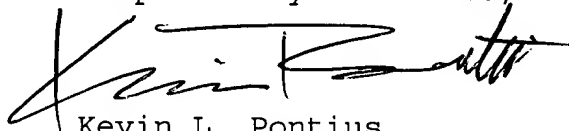

For the above reasons, Applicant respectfully submits that the application is in condition for allowance with claims 1-88. If there remain any issues that may be disposed of via a telephonic interview, the Examiner is kindly invited to contact the undersigned at the local exchange given below.
